...a glass of its own

PROFESSIONAL
HOTEL
EQUIPMENT

Competence

WMF firstglass

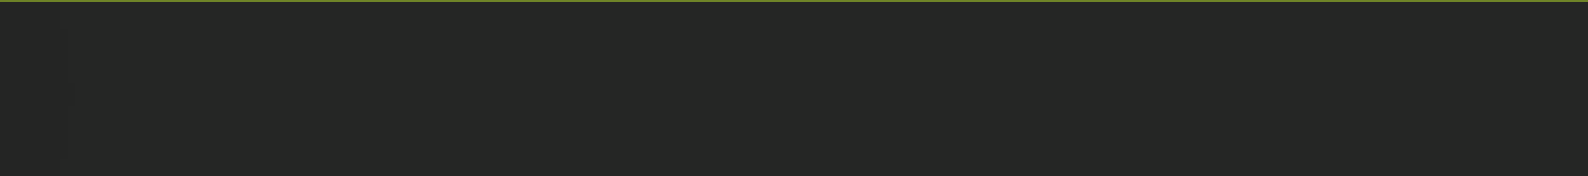

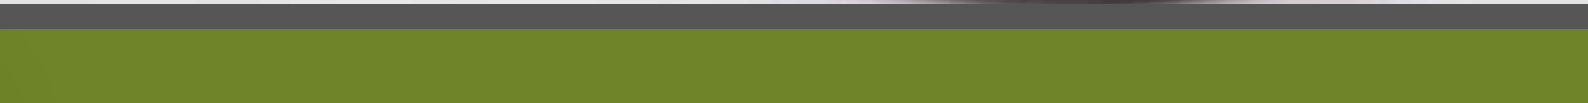

...a glass of its own

For us, competence means a lead-free crystal glass with an appropriate shape and brilliance to serve the finest wines. Highly break-resistant and dishwasher-safe, this robust glass is designed to withstand the tough demands of everyday catering use. It is made seamlessly in a single piece, with no join between the stem and the bowl.

Competence in our products, which are the work of recognized designers whether for a stylishly laid table or to meet other individual requirements and desires, our varied product range has all the answers.

WMF products are manufactured to the highest quality using the very latest, environmentally friendly production methods.

Tradition

1893 was the beginning
WMF firstglass is the culmination

The first WMF glasses were pulled from the fire back in 1893 and turned into beautiful, high-quality vessels. Over the years, automation and increased efficiency gradually took over from production of hand-blown individual pieces. One constant, though, has been the knowledge acquired over decades and the quality that results. WMF firstglass is the brilliant proof.

WMF firstglass Design

less is more

No other product can match perfect glass as a showcase for something special. Perfect quality and the finest finish are immediately obvious to the touch. Not even the tiniest imperfection mars the view of the inside. The effects are not created by glass as a material, but by the fine reflections and the smooth, curved shapes. These work together beautifully in WMF firstglass to frame the contents and show them off to best advantage.

Essential

WMF firstglass

form follows function

A practical selection of glasses does not have to occupy a gigantic glass cabinet. After all, it makes sense to own only glasses in designs that truly delight the palate.

BURGUNDY – Gives wines ample breathing room and interaction with oxygen thanks to its large cup design and generous opening. Perfect especially for full bodied red wines and those with low tannin content.

BORDEAUX – Comes in a slightly slimmer and higher design to concentrate the bouquet and to place the emphasis on the fruit flavours of the wine. The optimum glass for red wines rich in tannin.

RED WINE GOBLET – The versatile classic design with a narrow opening to ensure that the focus is never on the acids of the wine. These glasses are perfect companions for red wines, but also for full-bodied and Barrique matured white wines.

WHITE WINE GOBLET – Small volume holding narrow glass that keeps the focus on the bouquet and fruit flavours of the wine. The ideal glass for light-bodied, dry and younger white wines.

PORT – Small goblet for dessert wines that does not place excessive focus on the residual sweetness of these wines.

CHAMPAGNE, SPARKLING WINE – These glasses come in the characteristic tulip design that fosters the development of foam on champagne and sparkling wines. Thanks to the sparkling point, they create bubbles that are more subtle and elegant.

MARTINI – Its typical triangular design makes the Martini glass the probably most recognized bar glass for classic cocktails.

BRANDY GLASS – The perfect snifter with its wide vessel helps evaporate the brandy into aroma, while the narrow opening helps to trap the aroma of noble cognacs or brandies for pure enjoyment.

DESTILLATE AND DIGESTIVE – The proportions of these glasses are optimally aligned as well: the cup opens towards the top and the stem's length is perfect. The most delightful way to enjoy Grappa, Trester and Eau de Vie.

WMF DIVINE

Divine

divine drinking pleasure

Just like in the days of hand-made individual pieces, Divine is convincing with a gently curved, thin-walled bowl tapering down fluidly to the stem and base. And the bowl narrows towards the top to enable the bouquet of the wine to develop fully, to maximise the drinking pleasure.

WMF SMART Solid

simply substantial

The timeless design of our „Smart“ glass series accommodates all of the exacting demands of contemporary table setting culture. The glass is somewhat thicker and definitely more robust than that of conventional glass designs; yet each glass is optimally balanced and feels great in the hand. A streamlined range, our „Smart“ series offers the perfect drinking glass for every occasion and for everyday use.

Selection

You can simply feel
when something is right

Almost any items can be placed together; indeed many consider this a modern trend. Genuine harmony however, comes only when things truly belong together. Without doubt, our accessory combinations are a fine example of this. And your guests will certainly take notice.

WMF CARAFES

Wines are most prominent at the bar in a decanter, whilst mineral water is served stylishly at the table.

WMF DECANTER

The large decanter base allows the wine to breathe and the full flavour of the wine to develop

Impression

Making a mark

Trademarks, and that includes your business logo, don't just exist – they have to be created anew every day. The work you do, your skills and the service you provide have a name. Show that name as often as you can and make an 'impression'. For example, by personalising items with a mark or a vignette, applied by screen printing or engraved by sandblasting.

Marks and vignettes

Screen printing enables logos to be applied in fine detail, including in several colours. So you can reproduce your logo perfectly. If your logo is 'engraved' by sandblasting, it is permanently preserved in the glass and provides an unbeatable touch of finesse. But no two logos are alike. A complex logo can be far harder to 'fix on the glass' than a simple, straightforward one, for instance. That's why the prices for multicolour printing and sandblasting have to be calculated for each individual job.

Additional charges (net) for marks and vignettes

Screen-printing (fine detail)

	Qty. 60 or more Per glass size	Qty. 120 or more Per glass size	Qty. 240 or more Per glass size	Qty. 500 or more Per glass size
Vignettes				
Single colour/ screen printing	1,10 €	0,70 €	0,60 €	0,50 €
Gold or platinum	1,20 €	0,80 €	0,70 €	0,65 €
Multicolour printing	On request	On request	On request	On request

Additional charges (net) for line customisation

The officially valid line (i.e. line, capacity indication and manufacturer's logo) are 'engraved' by the sandblasting process.

Additional charges for line customisation by screen printing

	Qty. 60 or more Per glass size	Qty. 120 or more Per glass size	Qty. 240 or more Per glass size
Single line			
Capacity indication	0,35 €	0,30 €	0,25 €
Double line			
Capacity indication	0,40 €	0,35 €	0,30 €

Additional charges for line customisation by Screen-printing (fine detail)

	Qty. 60 or more Per glass size	Qty. 120 or more Per glass size	Qty. 240 or more Per glass size
Standardisation			
Single and double	0,45 €	0,40 €	0,30 €

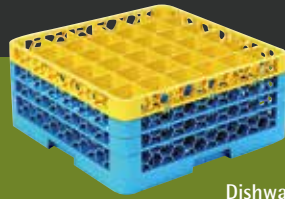

Minimum order quantities and tooling costs

Minimum order quantity 60 (including for repeat orders). We reserve the right to change the order by a margin of +/- 10%. If tooling is not available, tooling costs will be charged pro rata with the first production order. If reproducible artwork is available, the cost is approx. EUR 70.00. If reproducible artwork has to be made up, the cost is approx. EUR 250.00.

Sparkling brilliant
Clear
even after countless washings

Cloudy glasses never look quite clean, and they don't reflect well on your standards. Often, there's nothing one can do about it. Contact with sharp objects in the dishwasher will cause this for nearly any frequently used glass. But all is not lost: New manufacturing processes and tougher materials help to prevent clouding, even in the rough and tumble of catering use. With the sparkle of WMF firstglass you will have unspoiled pleasure in your glasses for years.
